SUMMARY

Python and AI Developer with hands-on experience in Django backend development, AI/ML model building, and technical training. Currently working as an AI Developer and Python/AI Trainer, handling internship batches, Python classes, Django projects, and beginner-level AI/ML training.

Strong practical knowledge in building web applications, LMS/ERP systems, machine learning mini-projects, resume validation systems, and AI-integrated student projects. Skilled in Python, Django, REST APIs, MySQL, SQLite, Streamlit, Pandas, NumPy, Scikit-learn, OpenCV, and basic deep learning workflows.

Looking for opportunities in Python development, Django backend development, AI-integrated web applications, or technical trainer roles.

EXPERIENCE

AI Developer / Python & AI Trainer September 2025 – Present

Linnk Academy India / Linnk Group

- Handling Python, Django, and AI/ML training sessions for internship and beginner-level batches.
- Teaching core Python concepts including loops, functions, OOP, exception handling, file handling, and data structures.
- Training students in Django web development, CRUD operations, authentication, database integration, and project building.
- Guiding students through AI/ML topics such as NumPy, Pandas, data cleaning, statistics, machine learning basics, regression, classification, and evaluation metrics.
- Preparing practical tasks, assignments, question banks, mini-projects, and assessment materials.
- Supporting students in building real-world projects using Python, Django, Streamlit, and machine learning libraries.
- Working on AI-integrated web applications and internal project ideas.

AI Engineer Intern November 2024 – June 2025

Bangalore

- Worked on Python-based AI/ML projects and model-building workflows.
- Gained practical exposure to data preprocessing, model training, prediction systems, and evaluation.
- Built beginner-to-intermediate AI/ML models using Python libraries.
- Improved understanding of AI project structure, datasets, feature handling, and deployment basics.

PROJECTS

EduCore – College ERP & LMS Platform | Technologies: Python, Django, SQLite/MySQL, HTML, CSS, Bootstrap, JavaScript

- Developed a full-featured college ERP and LMS platform with multiple user roles.
- Implemented role-based access for Admin, Office Staff, Teacher, and Student.
- Built modules for course management, student enrollment, lessons, sections, assignments, exams, and messaging.
- Added teacher portal features including dashboard, course management, assignment grading, student tracking, and exam control.
- Developed student-side features including course access, lesson progress, assignment submission, exam attempts, and profile results.
- Integrated exam features such as objective/written exams, question management, attempt tracking, auto-submission logic, and grading workflow.

- Implemented an internal messaging system named EduCore Connect for direct, course, section, announcement, and system messages.

CareerCompass – AI-Based Career Guidance System | Technologies: Python, Django/DRF, Machine Learning, Pandas, Scikit-learn

- Designed an AI-based career recommendation system for students.
- Collected user inputs such as skills, interests, education background, preferred work environment, and dream career.
- Built logic to calculate career match scores and identify skill gaps.
- Added Dream vs Reality analysis to compare student goals with current abilities.
- Generated personalized learning roadmap suggestions for career improvement.
- Planned recommendation features for job roles, internships, alternative career paths, and workplace environment insights.

CV Validator / ATS Resume Analyzer | Technologies: Python, Streamlit, PyMuPDF, Scikit-learn, Regex, NLP Basics

- Built a resume validation system that analyzes uploaded PDF resumes.
- Extracted resume text and checked sections such as skills, experience, education, projects, and contact details.
- Compared resume content against selected job categories such as Python Developer, Data Analyst, and NLP Engineer.
- Generated resume score, matched skills, missing skills, formatting issues, and improvement suggestions.
- Planned AI-based summary and recommendation generation for better resume feedback.

Brain Tumor Detection Model | Technologies: Python, TensorFlow/PyTorch Basics, OpenCV, Deep Learning

- Developed a basic image classification model for brain tumor detection.
- Used image preprocessing techniques to prepare medical image datasets.
- Trained a deep learning model to classify tumor-related images.
- Evaluated model performance using accuracy and validation results.

Student Performance / Placement Analysis | Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

- Worked with student datasets containing attendance, assignment scores, exam scores, study hours, sleep hours, and placement status.
- Performed data cleaning, missing value handling, duplicate removal, and basic exploratory data analysis.
- Used visualization techniques to understand relationships between academic performance and placement status.
- Applied basic machine learning concepts for prediction and analysis.

TECHNICAL SKILLS

Programming Languages: Python, PHP, JavaScript, SQL

Backend Development: Django, Django REST Framework, Flask Basics

Frontend: HTML, CSS, Bootstrap, JavaScript Basics

Databases: MySQL, SQLite

AI/ML Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Computer Vision / Deep Learning: OpenCV, YOLO, MediaPipe, TensorFlow Basics, PyTorch Basics

Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebook, Streamlit

Other Skills: REST API Development, CRUD Applications, Authentication, Role-Based Access, Data Cleaning, Model Evaluation, Report Preparation, Student Mentoring

TRAINING & TEACHING EXPERIENCE

- Conducted Python beginner sessions covering syntax, variables, operators, conditionals, loops, functions, and OOP. - Trained students in Django project development using login, signup, logout, CRUD, templates, models, views, URLs, and database integration. - Created practical exams and assignments for Python-Django students. - Guided students in mini-projects such as login systems, billing systems, attendance counters, mark sheet generators, quiz apps, and

student management systems. - Taught AI/ML basics including supervised learning, unsupervised learning, regression, classification, KNN, logistic regression, linear regression, and evaluation metrics. - Helped students debug project errors in Django, Streamlit, Google Colab, and Python virtual environments.

KEY STRENGTHS

- Strong practical knowledge of Python and Django. - Ability to explain technical concepts clearly to beginners. - Experience in building real-world student and LMS projects. - Good understanding of AI/ML fundamentals and project workflows. - Comfortable with debugging, project planning, and step-by-step implementation. - Interested in backend development, AI integration, and scalable web applications.

PROFESSIONAL TRAINING

AI Engineer Internship Bangalore Completed practical training in Python, AI/ML workflows, model building, and project implementation.

Python Full Stack and AI/ML Practical Training Hands-on experience with Python, Django, databases, frontend basics, data analysis, machine learning, and AI-integrated projects.

CAREER OBJECTIVE

To work as a Python Developer, Django Backend Developer, or AI Developer where I can build scalable web applications, integrate AI features, solve real-world problems, and continue improving my backend and machine learning skills.

DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge.
